

COVID-19 Vaccination Achievement in Nepal

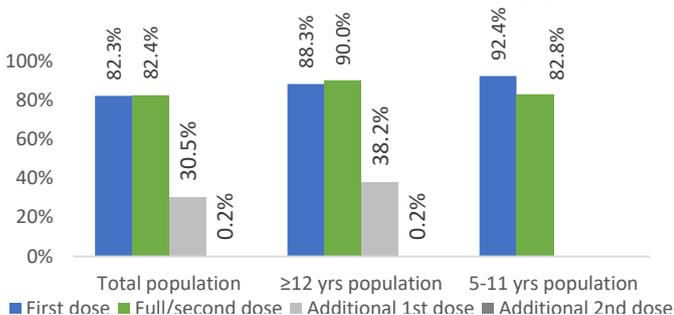

03 Jan 2023
19 Poush 2079 BS

The Government of Nepal aims to reduce morbidity and mortality by SARS-CoV-2 through vaccination to its citizens as per the availability of vaccine implemented in different phases and starting from highest risk groups.

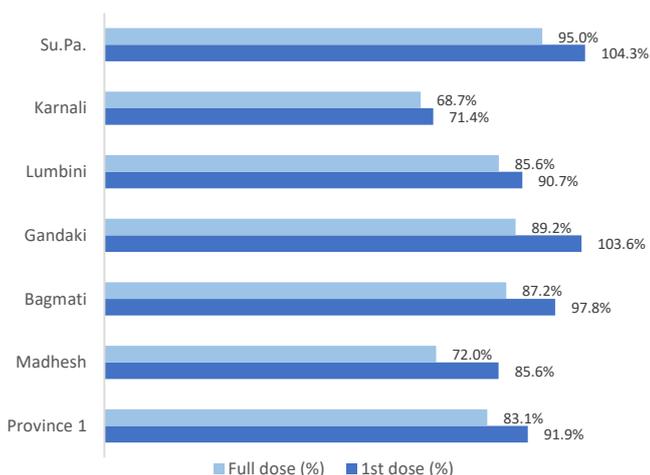

Highlights/Major milestones

- Till today, Government of Nepal has vaccinated 82.3% with first dose and 82.4% with full dose/second dose for total population.
- Nepal reached the milestone of vaccinating 70% of total population with full dose/second dose on 20 July 2022.
- Nepal reached the landmark of administering more than 50 million COVID-19 vaccine doses on 13th August 2022.
- Till now, Nepal has received 63,276,710 doses of COVID-19 vaccine from various sources.
- As of today, a total of 57,187,375 doses of COVID-19 vaccines (different types) have been safely administered which includes 8,921,037 booster doses.
- From 03 April 2022 (20 Chaitra 2078), the Government of Nepal has started vaccination for all the citizens ≥18 years who have completed primary series (full dose vaccination) with booster dose after three months of full-dose vaccination.
- From 09 June 2022 (26 Jestha, 2079), a booster dose was also started for 12-17 years after three months of full-dose vaccination.
- Government of Nepal has started COVID-19 vaccination (Pfizer) for the 5 to 11 years population in 2 phases from 23 June 2022.
- From 03 November 2022 (17 Kartik 2079) Government of Nepal started COVID-19 second dose of booster vaccination for the population 55 and above and the vulnerable (immune-deficiency/chronic patients, pregnant women, and health workers) group. (Data yet to come)
